Summary

A passionate and forward-thinking software engineer with a degree from the Polytechnic University of the Philippines, well-versed in Javascript and PHP. My experience extends across software development, UI/UX design, frontend debugging, and backend unit testing. Proficiency in HTML, CSS, Javascript, and frameworks such as Laravel and React enables me to create excellent solutions. A critical thinker and problem solver with a strong desire for professional and personal growth, I am excited to contribute to a team of skilled professionals and be part of the digital transformation journey while delivering high-quality software solutions.

Experience

SOFTWARE ENGINEER (INTERN)

You_Source Inc.

April - July 2022

- Conducted rigorous backend unit testing to ensure the quality and functionality of software components.
- Performed frontend debugging to identify and resolve user interface issues, enhancing the overall user experience.
- Collaborated with a team of professionals, utilizing C#, Typescript, and Angular to develop robust and efficient software solutions.
- Engaged in problem-solving activities, demonstrating critical thinking skills to overcome technical challenges.
- Participated in code reviews and provided constructive feedback to enhance code quality and maintainability.

Skills

- Web Development: Proficient in HTML, CSS, Tailwind CSS, JavaScript (ES6), PHP, and ReactJS.
- Frameworks and Libraries: Experienced in working with Tailwind CSS, Bootstrap, Laravel, jQuery, and MySQL.
- Front End Coding: Skilled in developing intuitive and user-friendly front-end interfaces.
- Problem-Solving: Demonstrated ability to analyze complex problems and devise effective solutions.
- Strong Communication: Excellent verbal and written communication skills, facilitating effective collaboration and clear conveyance of ideas.
